

Advantages of Electric Vehicles (EVs) over Gas/Diesel Vehicles

EVs are the Future:

EVs likely to be only **new** car choice in WA after 2035 ...
... and 10+ other states and 30+ countries, including EU
No **new** gas engine car sales expected in state after 2035

EVs have CHEAPER Lifetime ownership costs:

Cheaper to buy - (soon; some already)
Cheaper to maintain - fewer moving parts to break or fail
 No gas, oil, spark plugs, transmission, or tailpipe
 No catalytic converter to be stolen
Cheaper to drive - 50% to 75% less per mile
 EVs deliver 67% of energy to wheels; gas delivers 20%

EVs are HEALTHIER:

No particulate matter (PM2.5) or NO2 emissions
Reduces asthma attacks, cardiovascular diseases

EVs SLOW DOWN CLIMATE CHANGE

No Greenhouse Gas Emissions

EVs are FUN to drive
